PROJECT

- In-House Logistics & Shipping ERP System | Cliffline Shipping India Pvt. Ltd 2025-2026
Worked on the development of an in-house logistics and shipping ERP software at Cliffline Shipping India Pvt. Ltd., where I was involved in module creation, requirement analysis, and workflow design based on business operations. Acted as a project coordinator, handling communication between management and the developer team through regular meetings and discussions. Defined system rules, supported testing, and ensured continuous modifications to improve performance and usability. Focused on aligning the software with real-time logistics processes and business needs, contributing to overall system efficiency and smooth operations

- **PROJECT Online Security Service -2023**

Developed an online security services platform using HTML, CSS, and PHP for the front end and SQL for the backend as a mini-project. This project demonstrated proficiency in web development and database management, ensuring secure and efficient data handling.

- **Online Wedding Dress Rental store-2024**

Created an online wedding dress rental store using HTML, CSS, Python, and Flask for the front end, with SQL for the backend as the main project. This project showcased skills in full-stack web development and enhanced the user experience by providing a seamless, secure rental process

EDUCATION

- **Rajagiri College of Management and Applied Sciences**

2021- 2024

Mahatma Gandhi University

Bachelor of Computer Application
